INCIDENT

Date of Incident	January 31, and February 1, 2024
Location/areas affected	**DDOSC- Main Campus** Purok 10, Poblacion, Compostela, Davao de Oro
Description	24-HOUR PUBLIC WEATHER FORECAST Issued at 4:00 AM, 31 January 2024 SYNOPSIS: Northeast Monsoon affecting Luzon and Visayas. Trough of a Low Pressure Area (LPA) affecting Mindanao. Forecast Weather Conditions Area: Northern Mindanao, SOCCSKSARGEN, Caraga, Davao Region, Central Visayas, Biliran, Samar, Eastern Samar, and Southern Leyte Weather Condition: Cloudy skies with scattered rainshowers and thunderstorms Caused By: Trough of LPA Impacts: Possible flash floods or landslides due to moderate to at times heavy rains. FLOOD ADVISORY NO. 5 **ISSUED:** 6:00 PM, 01 FEBRUARY 2024 **FACTORS OF RAIN FALL:** TROUGH OF LPA **CURRENT SITUATION OF RIVER WATER LEVEL**: Receding water level is observed at upstream agusan river (davo de oro). But still at above critical level. *Source: DOST-PAGASA* On January 31, 2024,due to the severe flooding, the flood water has reach several establishments including DDOSC-Main Campus. One of the initiatives of the college is to make DDOSC as temporary evacuation center for students boarding nearby, faculty and staff including their family who are affected by flood. As a temporary shelter, the college has accommodated 71 evacuees during that period.

DAMAGES

Damages	Estimated Cost
Structures appeared intact, with no visible signs of recent structural failure or deterioration. Damages were from previously recorded from an earthquake event.	*Subject for further assessment by the PMU.*

- Despite the absence of new damages, it is recommended to continue monitoring the condition of structures, particularly those previously affected.
- Given the history of earthquakes, stakeholders are advised to remain vigilant and maintain emergency preparedness measures.
